

# New: Leather Saddle Girth for Dressage Saddles with a Tendency to Slip Forward – now even more convenient!

The popular Leather Saddle Girth for Dressage Saddles with a Tendency to Slip Forward has been upgraded for even more convenience for riders and their horses!

**Improved contact area:** The saddle girth now has a larger contact area on the horse's belly. This leads to a better distribution of pressure and provides the horse with maximum comfort.

**Improved fit:** Its curved design for elbow freedom and its well set-back buckles make it absolutely ideal for horses with a very forward natural girth position. Here, the saddle girth helps to keep the saddle in the correct position!

**Extra convenient:** The saddle girth has a new D-ring in the center for attaching auxiliary reins or a martingale if required.

The new Leather Saddle Girth for Dressage Saddles with a Tendency to Slip Forward is available in Black and Havana in lengths of 45 to 80 cm (18" to 32") from selected Passier stockists. You can easily find Passier dealerships in your area with the Store-Locator at [passier.com](http://passier.com).
